

# STAB<sup>®</sup> Mat

## Reinforced Matting for Unstable Surfaces

- Grips into wet ground, mud, sand, & soft surfaces.
- Creates a Firm, Stable, and Slip Resistant accessible route of travel.
- For outdoor problem areas such as trails, fields, gardens, and beaches.
- Passes ASTM F 1677-96 Standard for Slip Resistance for Wet & Dry Surfaces.
- Textured surface reduces the risk of slipping under wet conditions.
- Porous construction allows moisture to flow through footing surface eliminating standing water.
- U.V. Stabilized Material.
- Excellent weather resistance.
- Resistant to environmental and chemical degradation.
- Does not leach plasticizer.
- Cleans easily with sweeping or wash down.
- Patent No.: US 7,229,232 B2
